

AI, Automation & Project Management

Working Student (m/f/d) | Fully Remote | Competitive Pay

Your Impact

In this role, you support a real customer in delivering an AI-driven automation solution – and turn “AI potential” into measurable operational impact. You act as the central link between business, IT and our internal development team, ensure alignment across stakeholders, and make sure the solution delivers value in daily operations.

What You Will Do

- Align requirements and expectations between customer IT, business teams and internal stakeholders
- Translate business needs and user feedback into clear tasks and priorities for the project team
- Coordinate workstreams, track progress and improve delivery processes
- Support the implementation of AI automation solutions by facilitating communication, removing blockers and contributing hands-on to automation workflows (e.g., with tools like n8n, Make or similar)
- Prepare and moderate workshops, gather insights and ensure consistent documentation
- Turn project insights into structured recommendations — and contribute to improving our AI solutions
- Work remote-first and flexibly ~15–20 h/week alongside your studies

About You

- Enrolled at a German university in Business, Industrial Engineering, Business Informatics, Data Science or a related field
- Strong communication skills in German (C1+) and good English proficiency
- Strong organizational and communication skills – able to align different stakeholders effectively
- Structured and reliable – you keep track of multiple workstreams and priorities
- Independent and proactive – you take ownership and drive topics forward
- Interest in AI and automation and how they create business value
- Confidence in PowerPoint and able to structure and communicate complex topics clearly
- Bonus: First hands-on experience with automation tools (e.g., n8n, Make, Zapier or similar)

About Us

We are an experienced Karlsruhe-based team – building data-driven solutions for medium-sized companies & big corporates for 10+ years.

How To Apply (in under 10min)

Send a short cover letter (why are you a good fit?) + your CV or LinkedIn profile to jobs@novelsense.com. We look forward to hearing from you.
